

# Environmental Policy

Beerenberg's ambition is for its activities to cause minimal impact on the natural environment and for the company to continually improve its environmental performance.

Beerenberg's vision "Beyond Expectations" commits the company and all its employees to seek out solutions that exceed the expectations of those around us. Our efforts to promote climate and environmentally friendly practices should be Inclusive, Innovative and Responsible.

## OUR ENVIRONMENTAL POLICY INVOLVES:

- Adopting a risk-based approach where external and internal context is taken into account, in a responsible manner
- Setting out realistic and verifiable environmental targets and action plans
- Complying with the provisions of environmental law, ISO 14001:2015 and the company's own HSEQ management system
- Enable training and skills development in relation to the environment
- Include sustainability as essential evaluation criteria when choosing new products, services or suppliers
- Ensure sustainable operations through continuous follow-up throughout the supply chain
- Innovate to reduce our own and our customers' emissions and have a continuous focus on preventing acute discharges that may harm the external environment
- Reducing residual waste to a minimum and safe disposing of hazardous waste
